

GCI AMBASSADOR GUIDE

Thank you for becoming a Global Coherence Initiative (GCI) Ambassador! Participating in GCI is a notable step in the quest for co-creating positive change in the world through your commitment to heart-focused care and intention.

The Global Coherence Initiative is a science-based, co-creative project to unite people in heart-focused care and intention to facilitate the shift in global consciousness from instability and discord to balance, cooperation and enduring peace.

GCI is one of many care and compassion initiatives worldwide. Each year, as the need for change grows, more groups and online communities are forming to send out compassion and care around our planet.

We and others believe these collective heart-based initiatives will be the touchstones of lifting human consciousness and positive, collaborative activity in the future. GCI actively encourages individuals and communities to increase their love, care and compassion for all peoples of the world. We foresee that one day these qualities of the heart will define Earth and its inhabitants.

You and your fellow GCI Ambassadors come from myriad countries, walks of life, backgrounds and beliefs, all converging at a critical moment in history to create a more harmonious world. Choose the Select Language Icon to view GCI's web site in 65 different languages.

GCI Ambassador Resources

GCI has a variety of resources available to GCI Ambassadors at no cost. These include downloadable audio files, webinars, PDFs, e-booklets and research papers. Here are two of these free resources, which you can click for more details:

[Together in the Heart](#): This video discusses what the Global Coherence Initiative is; how to become a GCI Ambassador and participate; GCI's purpose and research; the Global Coherence Monitoring System; and the GCI website Global Care Rooms.

[The Energetic Heart – GCI version](#): This scientific monograph explores the HeartMath Institute's 21-year journey investigating how the magnetic fields generated by the human heart interacts other humans and animals. It discusses how the heart, in many ways, reaches out and connects with others in our environment.

[The Global Coherence Initiative: Creating a Coherent Planetary Standing Wave](#) – This scientific paper discusses coherence and overarching research hypothesis of GCI and reviews the scientific literature on the interconnectivity between humanity and the earth's energetic systems.

GCI Ambassador Commitment

As a GCI Ambassador, you agree to be willing to contribute in the following ways:

1. Increase Heart Coherence

The personal and collective heart coherence of the community is central to GCI's tenets and effectiveness. Increasing personal coherence helps to align body, emotions, mind and spirit through the power of the heart. Coherence serves as a facilitator, adding strength and effectiveness to your outgoing care, compassion, intentions and actions to help the world.

Irrespective of the practices you follow, increasing your coherence creates more ease and flow from the heart, which helps enhance your meditations, prayers, healing intentions and affirmations. Becoming more heart-coherent is the most important contribution a GCI Ambassador can make to the Global Coherence Initiative.

“Know that compassion for others is never wasted. It just has its own timing and higher discernment in how it plays out.” – Doc Childre, HeartMath founder

GCI's Introductory Heart Coherence® Technique

Use the Heart Coherence Technique often to increase and sustain your personal coherence. Here are the six steps of this powerful tool:

1. Breathe and calm yourself in whatever ways you choose.
2. Choose something you appreciate – a person, pet, nature, etc., and radiate the feeling of appreciation to them for about 2 minutes. This helps open the heart more and increases your effectiveness when you start sending care to the planet or to a situation that needs it.
3. Evoke a genuine feeling of compassion and care for the planet.
4. Breathe the feelings of compassion and care going out from your heart. (To help with focus, some imagine the compassion and care flowing out the way a river flows out to the sea. Others imagine their compassion radiating as a beam of light, or they radiate it out with the rhythm of their breath. Determine what is right for you.
5. Radiate the genuine feelings of compassion and care to the planet or to a specific area of immediate need.
6. See yourself joining with other caretakers to participate in the healing process and generating peace.

– *How long should you do the Heart Coherence Technique?* You decide. Most people do this technique at least 5 minutes a day to build personal coherence. The amount of time often increases for people when they begin to understand and experience the benefits of coherence for the sender and the receiver. Depending on your schedule, you likely will spend more time some days than others.

2. Increase Global Coherence Through Energetic Contributions

Your meditations, prayers, affirmations and compassionate and caring acts all are *energetic contributions* that benefit the planet. Numerous studies show group, or collective meditation, prayer and focused intention directed toward specific positive outcomes have beneficial and measureable effects.

GCI Ambassadors pledge their time to radiate coherent compassion and care out to the planet during times of need, especially in crises such as natural disasters. Because of increasing time pressures today, GCI does not require specific time commitments. GCI Ambassadors

should determine how much time and energy and when they can contribute to the project.

Some GCI Ambassadors devote a few minutes each day. Others contribute on weekends or other more convenient times. Let care and balance guide your commitment. Many people are more effective adhering to a structured time commitment, while others' jobs and lifestyles necessitate more flexibility. Not feeling constrained, thus stressed, allows you to contribute your best to our shared mission of creating a better world.

GCI occasionally gives GCI Ambassadors suggested practice plans for increasing coherence and designates where to focus compassion. Our goal is to establish a new baseline of collective coherence on the planet to offset the buildup of planetary stress and distortion.

emWave® Coherence Technology and Inner Balance Trainer: If you have an emWave2®, emWave Pro® for Mac or PC, or Inner Balance™ for iPhone/iPad/iPod use it while practicing the Heart Coherence Technique. The handheld emWave2, computer-based emWave Pro technology and Inner Balance Trainer helps people learn to increase heart-rhythm coherence quickly and for longer periods. Each of these devices provides objective coherence feedback and measures. Using emWave or Inner Balance is not required for GCI Ambassadors' participation, but it is highly recommended for two reasons:

- It helps you raise your personal coherence baseline, which raises the community's collective coherence.
- It enables you to participate in GCI studies that require objective measures of participants' coherence levels.

The emWave2 and emWave Pro include the 59-page *emWave® Meditation, Prayer & Self-Help Assistant*, a guide to help you quiet the mind and get centered. Visit [emWave2](#), [emWave Pro](#) or [Inner Balance](#) for details and purchase information.*

Webinars and Teleseminars: GCI Ambassadors are encouraged to take part in free GCI Ambassador-only webinars and teleseminars that provide instruction for coherence-building and updates about a range of GCI activities.

Global Coherence Monitoring System: A critical element of GCI is the Global Coherence Monitoring System (GCMS), which measures fluctuations and resonances in Earth and the ionosphere's magnetic fields. GCMS state-of-the-art sensor sites continuously collect data used in researching mechanisms for how the earth's fields affect human mental and

**All proceeds support the Global Coherence Initiative and the Global Coherence Monitoring System.*

emotional processes, health outcomes and collective human behavior. GCMS technology will also explore how collective human emotional states and intentions may be reflected in Earth's electromagnetic fields. GCI Ambassadors will:

- Receive updates on the Global Coherence Monitoring System.
- Have access to Global Care Rooms (described below), live data, Earth rhythms, GCI Commentaries and GCMS Tech Talk.
- Can participate in synchronized research activities designed to measure the effects of group coherence.

Note: In the future, your energetic contributions will be essential for our scientific research. Increasing and tracking your coherence will enable researchers to study the effects of collective coherence on the earth's geomagnetic field, and the benefits of our intentions on social change.

All Coherence, Care and Compassion Count: Being coherently aligned while radiating care and compassion naturally increases your focus and effectiveness, and *any* genuine care and compassion you radiate benefits the planet, even at lower levels of coherence. Radiate care and compassion for the planet while simply driving, exercising, doing yard work, standing in line or all sorts of other circumstances. Your sincere intention is vital and effective.

3. Participate in Community Actions

Periodically, GCI Ambassadors will be asked to participate in synchronous activities to collectively radiate heart coherence for specific needs around the world. The purpose is to lessen the emotional stress on people in crises such as natural disasters, terrorist attacks or social unrest.

A highly effective forum for GCI Ambassadors to participate in is GCI's Global Care Rooms, where GCI Ambassadors gather online for monthly synchronized Care Focuses. When crises or needs arise, GCI Ambassadors from around the globe receive invitations to real-time sessions available three times each day. You also may visit [Global Care Rooms](#) any time.

GCI Ambassadors should stay up to date on GCI activities by reading periodic messages, listening to podcasts that will be posted on the GCI website, www.heartmath.org/gci, and attending recommended webinars.

Join the conversation on [GCI's Facebook page](#) to stay informed and in touch or get connected with GCI's mission of global harmony. Or, join thousands of others who follow the [Global](#)

[Coherence Initiative on Twitter](#), and read what our scientists are working on today and what GCI followers are tweeting. Or [Global Coherence Initiative YouTube](#) channel to view video presentations.

4. Share the GCI Message

As a GCI Ambassador, you are uniquely informed and qualified to share information about the project with friends, family, colleagues and others. There are several easy ways to do this:

- Click on any of the social media icons on our website, www.heartmath.org/gci, and share with friends, family and colleagues.
- Download the [GCI brochure](#) in the site's Resources section and share it with friends, family and colleagues.
- Send invitations for webinars and other GCI events.

5. Financial Support

There are no financial requirements for being a GCI Ambassador. Everyone, regardless of ability to make financial contributions, is welcome and encouraged to participate. We ask GCI Ambassadors to recognize that continued deployment of the Global Coherence Monitoring System, research activities, providing future resources to GCI Ambassadors and expanding the GCI Community all require funding. GCI Ambassadors are encouraged to contribute and/or help raise funds for the project. [Learn about various ways to contribute.](#)

6. Next Steps

- You will be contacted periodically by email about Care Focuses, upcoming events, news, availability of video and audio interviews and other GCI resources, events and activities.
- Review and start practicing the Introductory Heart Coherence Technique described earlier in this guide to begin building your personal coherence.

Thank you and congratulations on becoming a GCI Ambassador in the Global Coherence Initiative Community. Together let's shift global consciousness from chaos to coherence and create enduring harmony and peace.
